Introduction

- A sliding puzzle, sliding block puzzle, or sliding tile puzzle is a combination puzzle that challenges a player to slide (frequently flat) pieces along certain routes (usually on a board) to establish a certain end-configuration.

Introduction

What can this app do?

It can create 4 different board sizes.

- 2x2 - easy
- 3x3 - medium
- 4x4 - hard
- 5x5 – expert

2:40 ⚙ 📄

Sliding Puzzle

Leaderboard

Joe	2 x 2	5
Jim	3 x 3	40
no name	3 x 3	44
Jim2	3 x 3	53

What can this app do?

- The number of moves you use to finish the game will be recorded to the server and shown on the Leaderboard which is shared among players.

Literature Review

- Numpuz is one of the most downloaded Puzzle games with more than 100,000,000 installs.
- It has many board configurations

Literature Review

- It has the style of play that millions of players around the world love!
- It used picture instead of number which is more challenging for player.

Methodology

Layouts

Main Activity

BoardView class extended from View class to draw board and handle Touch Event.

```
class BoardView (context: Context?, private val board: Board): View(context) {  
  
    private var width = 0f  
    private var height = 0f  
    override fun onSizeChanged(w: Int, h: Int, oldw: Int, oldh: Int) {...}  
  
    private fun locatePlace(x: Float, y: Float): Place? {...}  
  
    override fun onTouchEvent(event: MotionEvent): Boolean {...}  
  
    override fun onDraw(canvas: Canvas?) {...}  
  
    init {...}  
}
```

BoardView.kt

	8	7
4	2	5
6	3	1

Add boardView to mainView in activity_main.xml

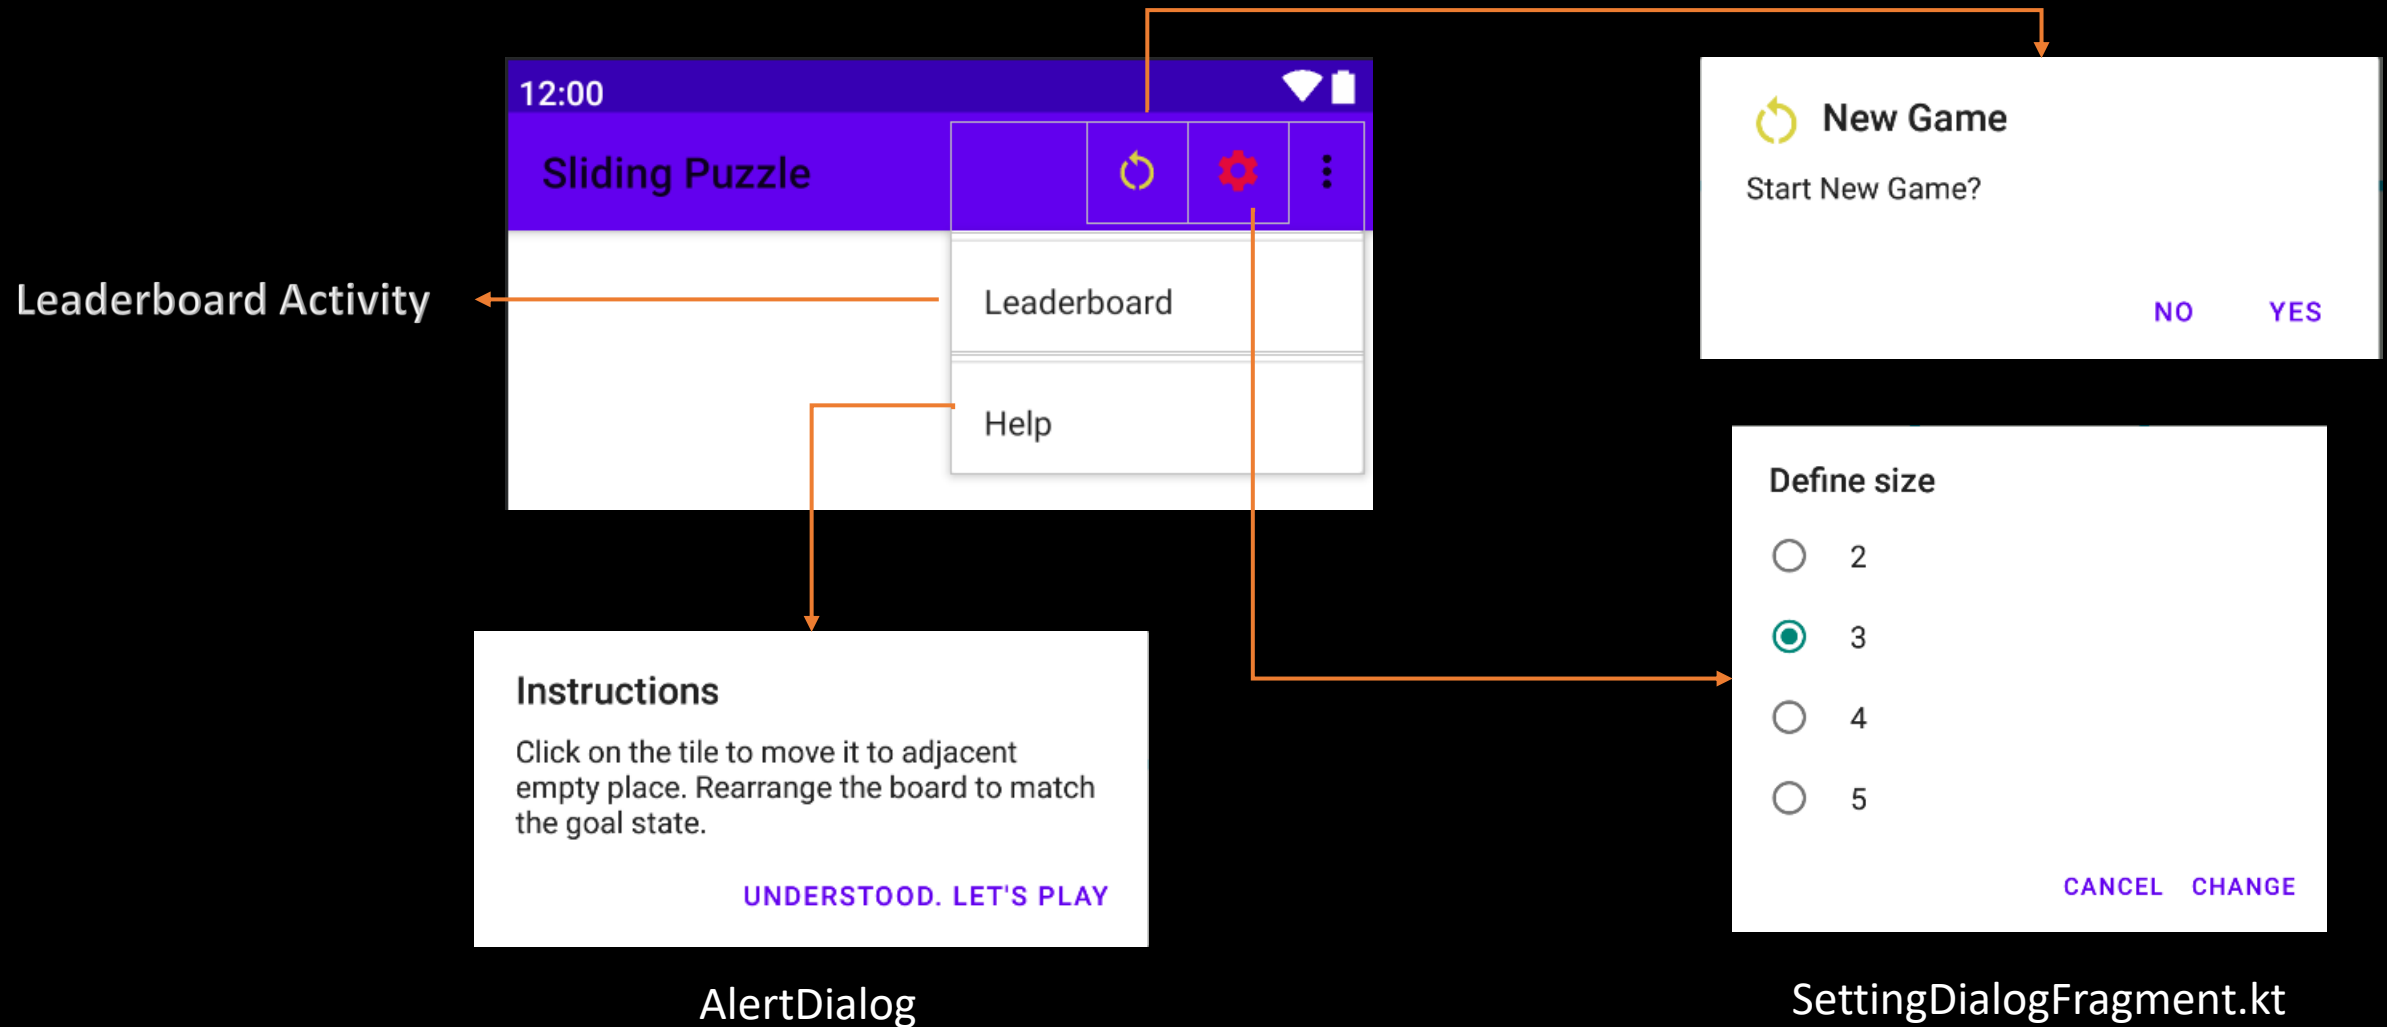

```
boardView = BoardView(context: this, board!!)  
mainView!!.addView(boardView)
```

Live Demo

Summary

The application works. Users can play different board configurations.

Competition between users is available in the form of Leaderboard.

Future works

Use the photo taken by user on the tiles instead of plain number, this will be more challenging and increase user interaction with the application.

Currently Leaderboard can only “Add” new entry, the next step is to create Login service so that user can “Update” the existing entry e.g., update name or score.

THANK YOU
